## Freestone Individually Wrapped Pickles: The On-The-Go-To Pickle

Freestone's individually-packed, single-serve pickles are available in four flavors - Dill, Garlic Kosher Dill, Hot and Sour. The largest seller in the Freestone family of pickles and related products, the pickles are distributed through convenient stores and vending channels. Our special processing and packaging means our pickles require no refrigeration and have a shelf life of up to two years. The convenient, "on the go" pouches are packed four (4) attractive, brightly colored display boxes to a case. Contact us for samples and information regarding our products. KK = Crinkle Cut

SC = Smooth Cut

The Freestone Pickle Company has been family-owned and operated since 1903, producing all of its products with homemade brine recipes. Our full product line is made in the 50,000 square foot manufacturing plant in Bangor, Michigan at one of our original company locations. We now process more than 50,000 pounds of product per day to create 85 different pickle, pepper and cauliflower products for food service, retail, private label, wholesale, institutional and vending customers. From the 18,000 bushel capacity in the 1930's, Freestone's pickle tanking capacity has grown to approximately 350,000 bushels - over 17 million pounds of pickles annually.

“Our family name on each package is the guarantee of a consistent and quality product, and has been since 1903. Six generations of our family have been involved in the production of quality pickle products.”

Mike Hescott  
President
